</tr>
</tbody>
</table>

MOVEMENT STANDARDS

Wall ball
In the wall ball, the medicine ball must be taken from the bottom of a squat, hip crease below knee, and thrown to hit the specified target. The center of the ball must hit the target at or above the specified target height. If the ball hits low or does not hit the wall it is no rep. Using an additional ball, box or other object to check for proper depth is not allowed. If the ball is not caught between reps, it must come to a full stop on the ground. Bouncing the ball off the floor is not permitted.

Double-under
This is a standard double-under in which the rope passes twice for each jump. Only successful jumps are counted, not just attempts.

Muscle-up
The arms must come to a full lock out (with or without a “false grip”) with the feet off the ground. The elbows must fully lock out while supporting yourself above the rings.

EQUIPMENT
To complete this workout you will need:
- A medicine ball of the appropriate weight for your division
- A wall of target set at the specified height
- A jump rope
- A set of gymnastic rings hung so that you can successfully perform a muscle-up

VIDEO SUBMISSION STANDARDS
Prior to starting, film the measuring of the height of the wall ball target. All video submissions should be uncut and unedited in order to accurately display the performance. A second person with a stopwatch will need to be in the frame throughout the entire workout. Shoot the video from the side so that it is clear that proper depth and height is being reached on the wall ball and that lockout is shown at the bottom and top of the muscle-up. For a video submission example click here.

ADDITIONAL NOTES
Please be sure to watch the entire workout instruction video for full details. Every rep counts in this workout. Credit will be given for partially completed rounds. You will enter your result by the number of rounds completed, plus the number of wall balls, plus the number of double-unders, plus the number of muscle-ups in the final round (if incomplete). If you do not complete the first round, enter 0 for rounds and then the number of completed reps of each exercise.
